

ENVIRONMENTAL POLICY

The Company is committed to the preservation of the environment. We shall strive to adhere to this policy in all aspects and at all stages of our business operations.

To conserve the environment we shall:

- Be committed to continual improvement through the prevention and reduction of wastes; recycling and pollution of air, water and land contamination
- Comply with all environmental legislations, regulations and requirements relevant to our activities and services
- Review and revise our environmental objectives and targets at the Management Review meeting
- Promote environmental awareness amongst our employees and sub-contractors
- Communication of this policy to our employees and sub-contactors
- Ensure that this policy is made available to interested parties when and where necessary
- Ensure that this policy is available to the public
- Encourage our customers to consider environmentally sustainable decisions with the maintenance solution we offer
- Consider and manage the environmental impacts of our service delivery using standard operational controls such as task assessments, JSEA's and work instructions
